

Amazon Prime Video Analytics Dashboard

Transforming Exploratory Data Analysis(EDA) into an Interactive Power BI Dashboard

Project Description

This project transforms insights from the Amazon Prime Video dataset into an interactive Power BI dashboard .The dashboard helps analyze content trends ,ratings ,genres, production-countries, ,runtime,release pattern to support data -driven decision-making.

Dataset

- Source : Amazon Prime Video Dataset
- Total Records : 999
- Dataset Type : Movies & TV Shows

Tools Used

- Python(EDA)
- Power BI
- Power Query
- DAX

Business Problem

Amazon Prime Video has thousands of titles.

It is difficult to understand:

- Which genres are most popular?
- Which countries produce the most content?
- How have content releases changed over time?
- What are the average IMDB and TMDB ratings?
- What is the average runtime of content?
- Which content type more produce?
- Which content are more famous?
- How many content are their?

Business Objectives

- Analyze content distribution.
- Compare Movies and TV Shows
- Analyze Rating and popularity.
- Identify top genres and production countries.
- Build an interactive dashboard for business users.
- Analyze famous of content
